

**Contact Lens Wearers:
Contact Lens Disclosure and Consent
Welcome to Contact Lens Wear!**

Contact lenses are exciting and can really enhance your quality of life. Contact lenses are a medical device regulated by the FDA and we, as your eye care professionals, routinely monitor the fit of the contact lenses as well as the health of the eyes, suitability of the ocular surface for contact lens wear, and any problems that can arise from contact lens wear. This includes additional services not performed during a routine eye examination.

All contact lens patients will be charged for this further evaluation. Insurance companies require that we bill contact lens fitting/evaluation charges separately from your comprehensive eye examination. This fee will range from \$97.00 to \$147.00 depending on the type of contact lens, level of difficulty, doctor/staff time involved and certain health aspects. Certain vision insurance plans will pay a portion of this-fee-and we can help you sort through these aspects of your plan.

Issues can arise that were not first noted with contact lens wear. These issues can be medical or vision-related due to contact lens wear. Many of these issues are unforeseeable and may require additional time with the doctor. We will help you with these issues, but if they occur after sixty days from the initial evaluation, there will be a professional fee that allows us to help you sort through these problems. This reduced fee for this service is \$35.00 for any issues within the first six months and \$50.00 for any issues after six months but still within your twelve-month prescription period.

We want you to be very successful with your contact lenses and we will strive to help you in every way to achieve your goal of contact lens wear!
